# Floorplanning

Rooms stitched together in a floorplan for each level

Visualize the relationship between rooms and levels. Instantly understand the entire space.

About Floorplanning

The floorplanning add-on takes Plnar's individual fully-measured 2D and 3D room plans and converts them into schematic floor plans of each "level" of a home. Floorplans provide full context of the loss, illustrates where continuous flooring flows, and other nuances of the loss site that may not be visible in individual room plans alone.

- ✓ Automated Sketch Ingestion by Xactimate *CoreLogic coming in June 2022

- ✓ Quickly & easily calculate continuous flooring or ceiling estimates

- ✓ Scaled 2D schematic png's & auto sketch import into Xact included
