

Integrations

Xactimate, CoreLogic, and Guidewire – We’ve Got You Covered!

Plnar seamlessly integrates with the most popular claim management systems and estimation systems in the industry, and if you have a proprietary system, you can leverage the Plnar api to connect. You can initiate projects from Xact, CoreLogic, and Guidewire; or directly from the Plnar Portal and easily sync back to your system.

Ingestion of Plnar Project Assets - Reports, Photos, 2D floorplans, and videos - as well as sketch generation (Xactimate and CoreLogic) of all rooms in 3D form is fully automated.

Austin, TX 78701
