# Manage Claims Virtually Without Going Onsite!

A New Dimension in Claim Capture

About Snap3D

Designed with simplicity in mind, Plnar powers virtual claims by providing simplified data capture, allowing anyone with a smartphone to document interior property damage. In fewer than 2 minutes per room, policyholders, adjusters, or third-party providers can document everything needed for Plnar to automatically generate complete data sets, room plans, measurement reports, and 3D models.

Plnar's SmartPix technology transforms any photo captured into fully measurable, interactive 3D models.

- ✓ **Complete – captures everything in a room from the smallest architectural elements like a bump out, to wet spaces and cabinetry**

- ✓ **2D Models, 3D Plans, SmartPix measurable photos, and a suite of reports makes estimating a Snap!**

- ✓ **Seamlessly integrates with Xactimate, CoreLogic, and Guidewire**
