SnapShot

Determine Method of Inspection quickly & accurately

Look Inside. Instantly

About SnapShot

Plnar SnapShot is the perfect low cost solution for claim triage on any severity claim. Policyholders utilize the Snap App to document the space in fewer than 2 minutes per room. Adjusters obtain photos and quick videos of each room instantly upon project submission, which enables them to determine method of inspection (MOI), create an estimate, upgrade to a full 3D plan, assign to a different adjuster, or visit the site for more complex claims - right from their computer! SnapShot is ideally leveraged at eFNOL or FNOL for maximum ROI.

✓ **Organized photos & room videos available instantly**

✓ **Easily triage assignments without going into the field**

✓ **Upgrade to Full-3D projects anytime, whenever needed**
